site and drinking water storage

WATER REFILLS

National delivery of fresh water, for both drinking and site use.

Current Health & Safety legislation requires that all construction sites provide hygienic drinking and washing facilities. Our fully automatic systems allow remote sites without mains facilities to benefit from hygienic potable water supplies.

These systems can be connected within hours from the initial order and are a cost effective alternative to laying water mains underground and can be supplied in a variety of sizes.

Our site water tanks can be used for mixing cements/concrete, washing, cooling, hydro demolition and concrete saws etc. We also hold stocks of high volume storage tanks for larger projects such as piling, river diversions and overpumping etc.

- 1 Vortex; this unique system gives unparalleled performance for sites with little available space and a need to clean the water quickly.
- 2 Towable jetter bowser, with high pressure water jet for surface cleaning, graffiti removal etc.
- 3 Dust suppression bowsers, complete with engine-driven pumps.

SETTLEMENT TANKS

With ever increasing demands to prevent 'dirty' water entering drains and water courses, we provide a comprehensive range of settlement tanks for heavy solids, suspended clays, debris and even oil/fuel.

TOW BAR OPTIONS

Mobile bowsers come with either a road legal or site spec tow bar option.

SITE SPEC TYRES

Mobile bowsers all come complete with 'Land Rover' style site spec tyres able to withstand the roughest terrain.

LIFTING RING

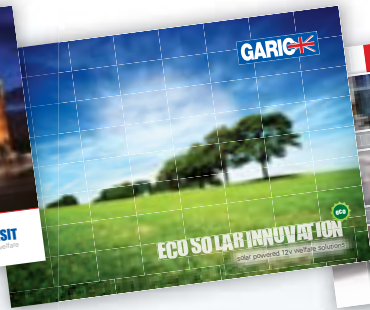

Need your water supply on the tenth floor? No problem! Garic water tank static bases also incorporate lifting rings, giving you the option of manoeuvring the tank using a crane.

STATIC BASE

As an alternative to the towable bower, water tanks can be supplied on a static base which can be easily manoeuvred by forklift.

Site/Drinking Water Bowsers

Dry Weight (kg)	Capacity
2750	300 gall (1350ltr)
2750	500 gall (2250ltr)
3500	1000 gall (4500ltr)
4500	2000 gall (9000ltr)

Dust Suppression Bowsers

Dry Weight (kg)	Capacity
2750	500 gall (2250ltr)
3500	1000 gall (4500ltr)
4500	2000 gall (9000ltr)

Water Settlement Tanks

Dry Weight (kg)	Capacity
350	300 gall (1350ltr)
500	500 gall (2250ltr)
1250	1000 gall (4500ltr)
1850	2000 gall (9000ltr)
4000	4000 gall (18000ltr)
6000	7000 gall (31500ltr)
8000	10000 gall (45000ltr)

Site/Drinking Water Static Tanks

Dry Weight (kg)	Capacity
750	300 gall (1350ltr)
125	500 gall (2250ltr)
300	2200 gall (9900ltr)

Jetter Bowsers

Dry Weight (kg)	Capacity
1275	300 gall (1350ltr)
1275	500 gall (2250ltr)
