Tanker	27276L / 6000gal.	6900Kg	TBC

Manufactured in the UK to exacting ISO standards and using heavy duty polyethylene, they can equip your site with a ready supply of portable and site water.

Each is fully towable for easy manoeuvrability on site. They're perfect for sites without mains water facilities and can complement the use of a static water tank by providing easy and close access to water when required for other products such as dust suppression equipment.

Garic stocks a broad selection of mobile water bowzers meaning we can get a water supply to you quickly and cost effectively. So whether you would like to buy or hire, we're here to help.

## KEY FEATURES:

- Secure water storage facility
- Top water inlet (filler point)
- Steel skid frame
- Heavy duty lifting eyes
- Plastic or steel holding tank (size dependant)
- Agricultural steel wheels and all terrain tyres

## OPTIONAL EXTRAS AVAILABLE
