

Garic

Sustainable Site Solutions

Battery Energy Store

Garic are leaders in environmental product offerings. With the introduction of battery power Garic now offers an alternative solution to power on site. With many applications, battery power now provides a solution for both air and noise pollution; with the added benefit of saving on fuel costs.

The Battery Energy Store provides emission-free, silent power. The energy storage system works with Solar power frames Solar Energy Store 20 or diesel generators to reduce carbon emissions and fuel usage by up to 80%. When used with renewable energy sources, it provides endless hours of zero-emission power.

Key Features:

- Low charge time
- ECM 7" Touch Screen Control Module
- Forklift Pockets, Lift & Drag Skid, Lifting Ring
- Telematics
- Water/Ingress Protection

Environmental Benefits:

- Reduced energy costs
- Reduced environmental impact and carbon footprint.
- Enhance corporate image and reputation for environmental stewardship

Minimum hire **1 week**

Standard Specifications:

Product name
Battery Energy Store 45/45

Product code
180201

Dimensions LxWxH
TBC

Weight
TBC

KVA
45

KWH
45

Battery Type
LFP (Lithium Iron Phosphate)

Phase
3

Operating Temperature
-20 to +50

Product name
Battery Energy Store 45/60

Product code
180202

Dimensions LxWxH
1450 x 1238 x 1788.2

Weight
1250

KVA
45

KWH
60

Battery Type
LFP (Lithium Iron Phosphate)

Phase
3

Operating Temperature
-20 to +50

Product name
Battery Energy Store 45/90

Product code
180203

Dimensions LxWxH
1450 x 1238 x 1788.2

Weight
1600

KVA
45

KWH
90

Optional extra available • Distribution Board • Cables
