

The heating system operates on diesel power and utilises a blown air heating system, resulting in a cost-effective operation aided by three 300-watt solar panels.

The unit has PIR controlled automatic LED lighting on entry, making it perfect for regular use on a busy site. The unit is fully secure with anti-vandal features along with heavy duty low level lifting eyes and fork lift inserts.

Key Features:

- External rain shrouds
- PIR lighting
- Heated drying room

Environmental Benefits:

- Solar powered with DC battery backup
- Insulated walls and ceilings

Minimum hire **1 week**
