

Our robust solar-powered self-contained IBC is the perfect solution for even the remotest of sites. It does not need a generator to run – it is powered by dual batteries which are charged by a 325w solar panel and has a high-pressure water pump.

It is delivered fully assembled with eyes for lifting via crane or Hiab, and fork pockets to enable easy movement around all sites.

So, when it gets to you all you need to do is add water and it is ready for use! To make things even easier for you, it also has an easy fill cap and a fill level sight gauge.

If needed, it can also be used with an add-on waste tank complete with pump and can have a mains water fill attachment added too.

The Garic Solar IBC is the perfect add-on for any site cabin, handwash or boot wash.

Key Features:

- Easy fill cap
- 4 hrs constant operation with one charge
- Fully assembled
- Robust construction

Environmental Benefits:

- Self contained system
- No generator required

Key Recommendations

- Ensure proper connection of water hoses
- Unit must be located in close proximity to unit it will be feeding water to
- Equipment should be commissioned in an unshaded position
- Only transport when empty
- Only lift when empty

Minimum hire **1 week**

Standard Specifications:

Product code
220200

Dimensions LxWxH
1640 x 1085 x 1443

Dry weight
100KG

Fresh water capacity
1000lt / 220g

Solar panel
325W

Structural material
Mild Steel and Plastic

Filling point
6" screw cap

Operating environment
Outdoor

Batteries
2 x 12v 45Amph

System voltage
2 x 12v 45Amph

Safety mechanism
Gas Strut Hinged Lid

Pump
High Pressure 17psi

Litres per minute
17

Power switch
Externally Mounted

Fork pockets & lifting eyes
Included

UV stabilized
Included

Drain point:
Included

Level gauge:
Included

Auto low voltage protection
Included

Lock mechanism
Included

Optional extra available

- Waste tank
- Low pressure mains feed connection
- Automatic submersible waste pump
