# Sustainable site solutions

Our sustainable solutions are designed to provide the most environmentally friendly and cost-effective combination of expertise, products, services and technology through the life of your project. As your requirements change, our sustainable site solutions flex so that our solution always provides what you need, when you need it.

This brochure focusses on our **Environmental** solutions. We also offer **Energy** and **Welfare** Solutions.

**From hassle-free tanker servicing to effective environmental protection, we've got what you need to operate a cleaner, greener site. We're not just about products, we're about partnership. We'll help you tackle your environmental challenges head-on, making your site a champion for the environment.**

If you're operating any worksite, you have specific legal responsibilities for maintaining the cleanliness of public roads and a duty of care to neighbours.

We also make it easy for you to manage on-site compliance through full end-to-end auditability of our tanker services for clean water in and dirty water out.

Our range of wheel washers helps you to comply with legislation as well as prolonging the life of your vehicles.

Unless stated otherwise, the min hire period is **1 Week**  
**Please note:** To ensure our rebrand is undertaken in the most sustainable way, our products will be supplied in either blue, as shown, or in our previous colours.

In addition, we can offer external air quality and noise monitoring as well as dust suppression equipment to help minimise risk to your teams on site and disruption to local communities.

Choosing us is choosing a long-term partnership, one that'll support you for the whole length of your project. By servicing your welfare units and your plant, we'll keep your site running smoothly while you focus on delivering for your customers.

**Sustainability that goes beyond box ticking to deliver real change.**

# Environmental Solutions

Solutions that protect the environment

Reducing your environmental impact is key. It's how you'll win projects, how you'll drive down costs, how you'll grow your business. But it's more complicated than just choosing green products. That's why we're here to help you.

# Site Servicing

One Less Thing to Worry About

We support our welfare solutions with a full in-house servicing team dedicated to removing waste, and replenishing water, fuel, and consumables.

With one vehicle and one visit, our servicing team solves all your waste, water, and fuel requirements. With a bespoke weekly, fortnightly or monthly visit from our servicing vehicle, we'll remove your site waste, refill water tanks and replace any welfare consumables.

We'll even provide our renowned 5-star service to sites where you use welfare units and cabins supplied by other providers, or provide a single replenishment or removal visit at a time that suits you. Tailored support, when you need it most.

That's one less thing to worry about.

That's thinking beyond the box.

## Waste removed

Waste tank and septic tank empties can be done through our servicing fleet.

## Water replenished

Clean water for toilets and water tanks can be filled periodically.

## Fuel refilled

We'll fill any fuel tank for self-contained cabins or bunded fuel tanks.

## Consumables restocked

Our 5-star welfare servicing includes replenishment of toilet roll and hand sanitiser on every waste empty and clean water fill.

## FORS Gold 7 years in a row.

We're committed to operating at the highest levels of the transport industry.

## National Sanitation Qualification

Our team is qualified in the PSE NSQ certification, demonstrating excellence and environmental responsibility in sanitation.

# Certifications

Garic is fully certified with all the industry's leading bodies, proving that our operations are always undertaken with health, safety and environmental responsibility in mind.

# Wheel Washing

Simple, effective, and efficient

Leave the roads the way you found them by minimising dirt and debris on the roads around your site

## Enviro Wheel Wash 14

- Power via existing mains supply or using a stand-alone supply such as our Solar Energy Store
- Flush-fit by digging into the ground to 325mm or above ground using rumble ramps.
- Rumble bars help agitate dirt before.

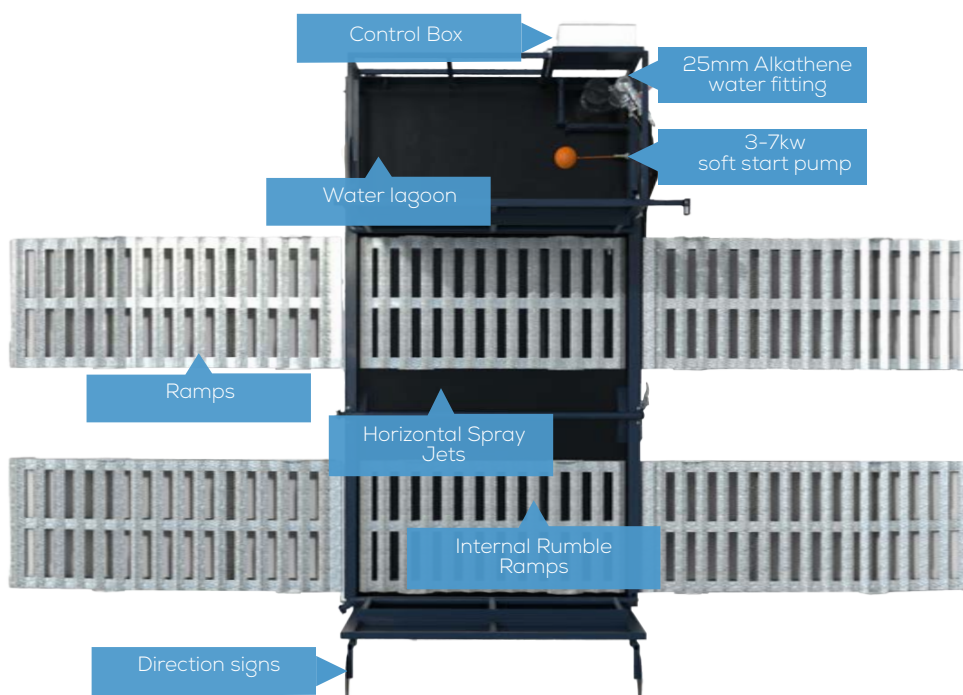

As the most compact powered unit in our range, the Enviro Wheel Wash 14 is tailored for small, low-traffic areas and projects with limited space. Specifically suitable for urban developments facing space constraints and challenges with dirt. The Enviro Wheel Wash 14 allows quick deployment without requiring movement orders, ensuring minimal on-site disruption during setup. It stands out as the smallest powered spray wash product in our lineup.

Rumble bars agitate treads which are then cleaned using high-pressure, automatic spray jets. This process

ensures a 360° clean of standard tipper lorry tyres. Its outstanding design means that travelling very slowly through the unit achieves a clean similar to our much larger units.

Please note that a 25mm water supply is required to give the unit its initial fill and keep topped up. Waste water is minimised as it is automatically recirculated from the containing sump beneath.

Product code	300003
Dimensions (without ramps) LxWxH	2500mm x 4578mm x 1805mm
Dimensions (with ramps) LxWxH	8657mm x 4578mm x 1805mm

# Enviro Wheel Wash 24

- **Elevated configuration is a quick set-up and removal on short-term sites.**
- **Sunken configuration can come with or without ramps and requires lagoon to be dug out.**
- **Recycles and re-circulates water to help you minimise your water usage on site.**

Our fully automated and totally self-sufficient Enviro Wheel Wash 24 is perfect for sites where sticky clay and mud can be a big problem. As vehicles pass through the wheel wash, automatic, powerful jets spray water onto the wheels, chassis and undersides, cleaning the vehicles in one fluid motion.

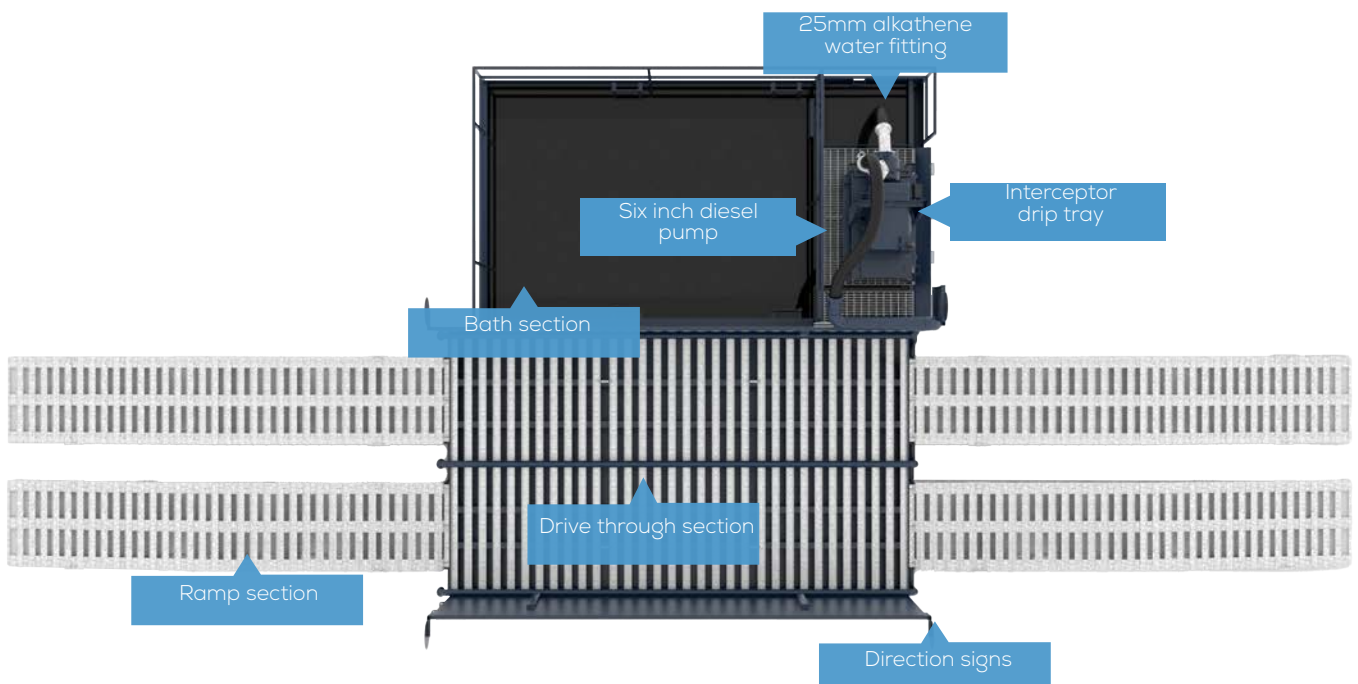

Available in two configurations: elevated or sunken.

A 25mm water supply is required to give the unit its initial fill and keep topped up.

Elevated option on some models

Product code	300002
Product code	300001 - <b>elevated</b>
Dimensions (without ramps) LxWxH	22 x 24ft / 6.7 x 7.3m
Dimensions (with ramps) LxWxH	66 x 24ft / 20 x 7.3m

# Enviro Bath 12

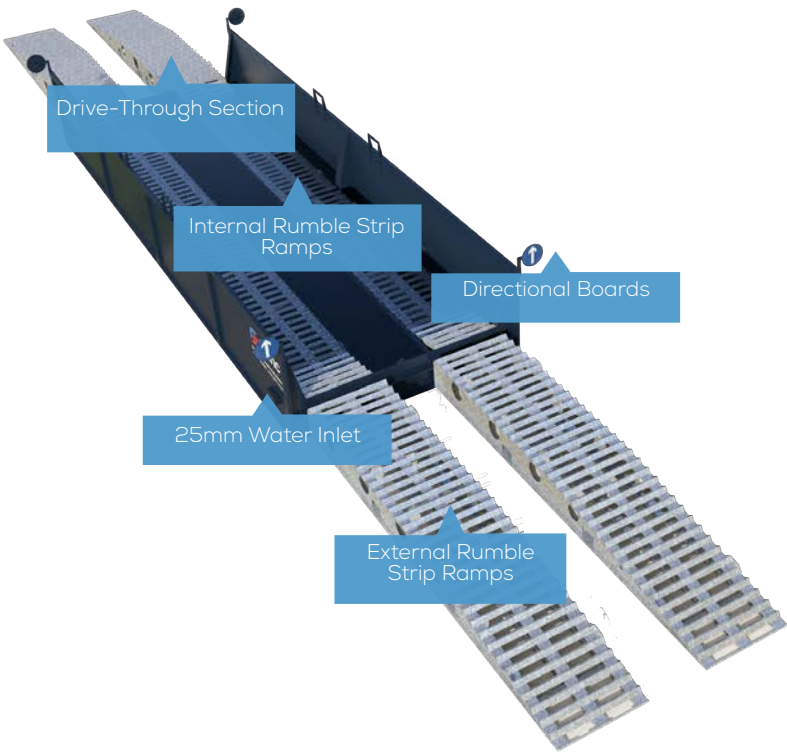

- **Unpowered lagoon helps clean the vehicle efficiently and sustainably.**
- **Steel fabricated wash area is durable and easy to clean.**
- **Rumble bars help agitate and remove dirt before, during, and after the water lagoon.**

The Enviro Bath 12 is an inexpensive yet very efficient vehicle wash system. It is ideal for sites that have moderate mud and dirt and for use on flat, solid surfaces. It's quick and easy to install, too so you can start using it straight away.

Trucks, dumpers, and lorries are cleaned as they drive over a series of rumble strips that shake off the heaviest earth. They are then washed as the wheels, chassis, and undersides pass through a water lagoon to provide a quick, safe, and effective cleaning system. If required, extra road rumble strips are available.

Please note that a 25mm water supply is required to give the unit its initial fill and keep it topped up.

Product code	300000
Dimensions (without ramps) LxWxH	35 x 12ft / 10.6 x 3.6m
Dimensions (with ramps) LxWxH	77 x 12ft / 23.4 x 3.6m

The background image shows two men in orange high-visibility safety vests with the 'Garic' logo. They are looking at a tablet together on a construction site. The man on the left has a beard and is wearing a dark jacket under his vest. The man on the right has long dark hair and is wearing a dark t-shirt under his vest. They are standing next to a piece of heavy machinery, possibly a backhoe loader, with a building in the background.

# Environmental Products

## Thinking Beyond the Box

Minimise your site's impact on the environment with a range of products designed to contain hazardous substances.

## Boot Wash

The latest boot wash from Garic is inexpensive and easy to install. It helps to keep your sites clean, safe and in good condition by eradicating dirty footprints along with the problem of premature wear and tear on carpets and flooring.

Each boot wash unit comes with a design update to the brush which means it's now easier than ever for your staff and site visitors to clean their shoes and boots before entering any clean-zones. The wash also features a removable grid for easy cleaning.

Built by us in the UK, the boot wash is available with either a three or five wash bay option and can be built to your own specification if necessary.

- Standalone boot cleaning unit
- Anti-slip steel foot platform
- Reinforced rubber water hose with brush

**3 Bay** Product code 310300

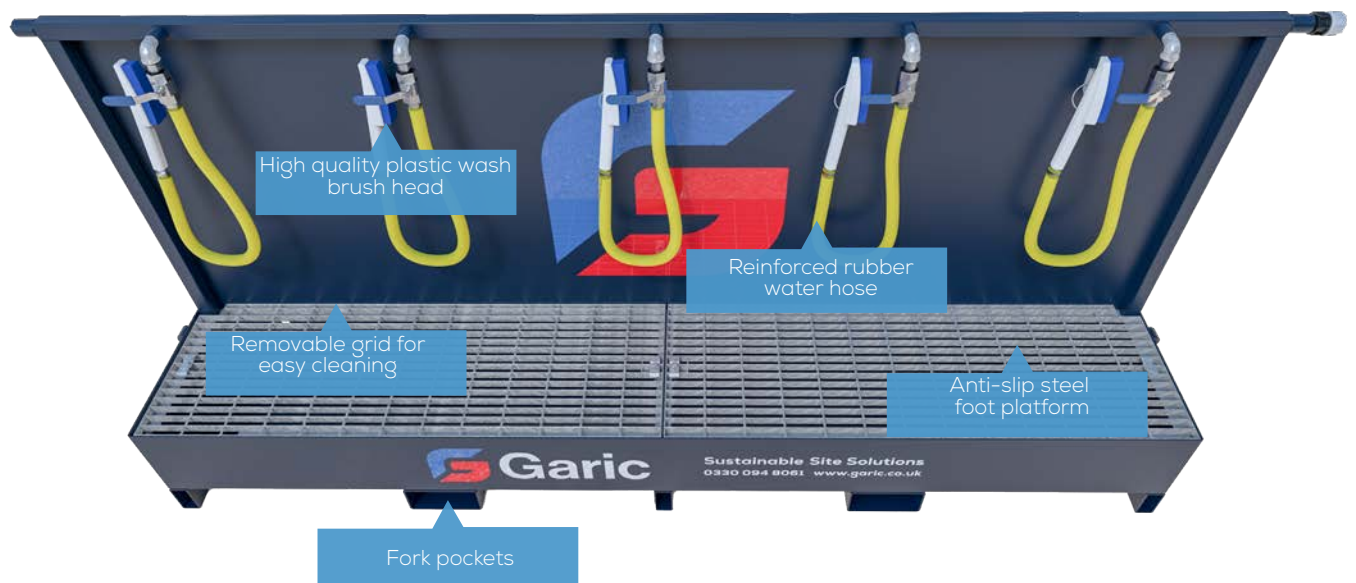

Dimensions 1600 x 600 x 1153mm

Weight 200kg

**5 Bay** Product code 310500

Dimensions 2660 x 600 x 1153mm

Weight 200kg

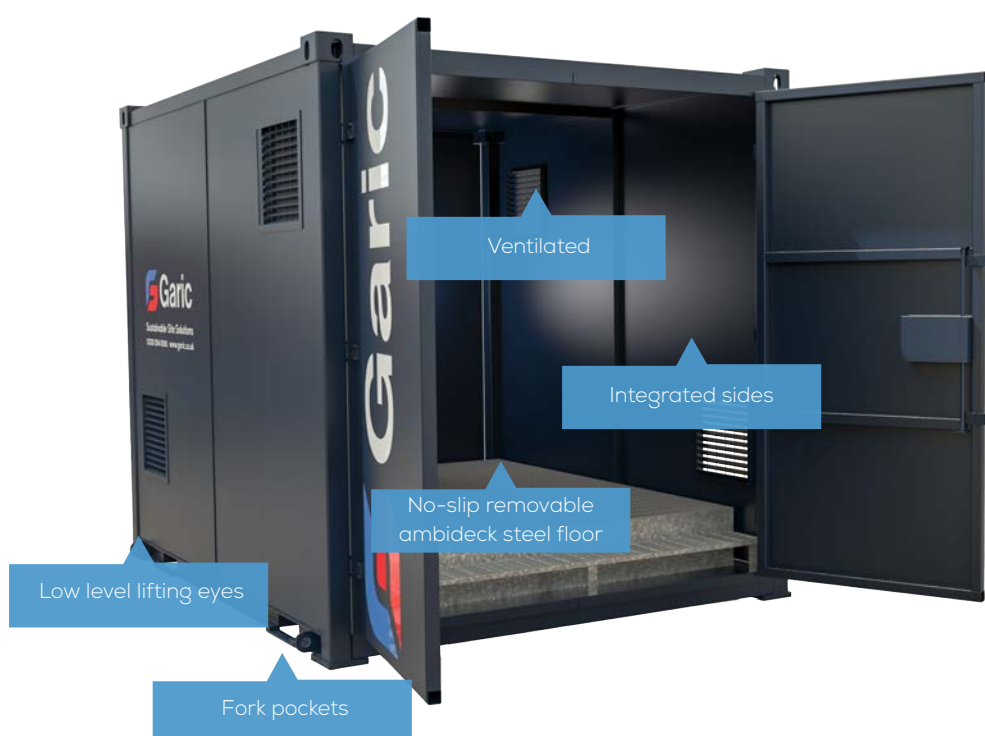

## COSHH Store 10

The COSHH Store 10 has been specifically designed to safely store and control hazardous substances such as oils, paints and other site use chemicals.

They are strong, secure and are built as standard with integral drip tray in the floor and extra large louvoured vents. These specifications give you peace of mind that all your COSHH requirements are being met.

Product code	191001
Dimensions	3 x 2.4m / 10 x 8ft
Weight	1759kg

- Internal drip tray to minimise risk
- Fully lockable steel unit
- Extra large louvoured vents

## Solar IBC 1000

**The perfect add-on for any site cabin, handwash or boot wash**

- Easy fill cap and fill level sight gauge
- Delivered fully assembled with lifting eyes and fork pockets
- Tilttable solar panel charges the batteries

Our robust solar-powered self-contained IBC is the perfect solution, even for remote sites. With a high-pressure water pump that's powered by dual batteries, charged by a 325w solar panel, there's no need for a generator. So, when it gets to you all you need to do is add water and it is ready for use!

If needed, it can also be used with an add-on waste tank complete with submersible pump and can have a mains water fill attachment added too.

Product code [240001](#)

Dimensions LxWxH [1640 x 1085 x 1443](#)

Dry weight [100kg](#)

## Waste IBC 1000

**A robust unit to hold your waste**

- Self contained system
- Fully assembled unit
- Galvanized steel cage

Our robust self-contained Waste IBC 1000 is the perfect solution for even the most remote sites.

Product code [220210](#)

Dimensions LxWxH [1,200 x 1,000 x 1,163mm](#)

Capacity [100L](#)

## Interceptor Drip Tray

**A world patented product to catch oil and fuel leaks**

- **Steel fabricated oil interceptor**
- **Sight level gauge**
- **World patented product so multiple sizes**

This simple yet highly effective design, which negates the need for filters or chemicals, and gives you instant environmental protection by preventing costly fuel and oil leaks.

The tray works on the principle that oil floats on water so during initial set up the main base of the drip tray is charged with two inches of water. As liquid falls into the tray, any oil and fuel naturally separates from the water leaving the water to pass safely through the interceptor outlet hole. The amount of oil and fuel retained in the tray is monitored by a sight gauge and when full, the residue can be removed ready for safe disposal at a licensed disposal site.

Product name	Interceptor Drip Tray 6
Product code	240610
Dimensions LxW	6 x 4ft / 1.8 x 1.2m
Dry weight	175Kg
Capacity	409L / 90gal

### Other available sizes:

8 x 5ft / 2.4 x 1.5m	691L / 152gal.
10 x 5ft / 3.0 x 1.5m	859L / 189gal.
12 x 6ft / 3.6 x 1.8m	241L / 273gal.

## Interceptor Wash Bay 12

**Clean site equipment whilst separating your waste and water**

- **Site level gauge (oil level indicator) & protector**
- **Interceptor drip tray with integral oil interceptor**
- **External ramps available for larger equipment**

The eco friendly wash bay evolved following the success of our highly effective interceptor drip tray which allows water to pass through whilst securely retaining oil, fuel and oil-based chemicals.

The Interceptor Wash Bay 12 allows you to clean site equipment safe in the knowledge that as the dirty water is draining away, any oil or fuel residue is being contained in the reservoir tray.

Its versatility means you can safely wash a huge variety of equipment from generators to dump trucks without the worry of fuel leaking into the ground or drainage system.

Smaller equipment is placed directly into the wash bay whilst larger units can be positioned via a ramp entry system or an alternative lifting method. Once the washing process is complete, you can be assured that the filtered water will have drained away, leaving the dirt, fuel, oil and grease securely in the reservoir for easy removal.

Product code	240001
Dimensions LxW	12 x 6ft / 3.6 x 1.8m
Oil holding capacity	1073 / 236gal

## Interceptor Drumstore

**Secure steel COSHH storage for use outdoors**

- Spring loaded lockable catches
- Steel mesh protective cage
- Oil level indicator

Store a range of drums in a secure environment safe in the knowledge that any leaks will be contained by the built in drip tray.

Available as either 8 x 5ft or 6 x 4ft.

Product name	<b>Interceptor Drumstore 6</b>
Product code	270620
Dimensions LxW	6 x 4ft / 1.8 x 1.2m
Dry weight	500Kg
Oil Holding Cap	682L / 150gal

Product name	<b>Interceptor Drumstore 8</b>
Product code	270820
Dimensions LxW	8 x 5ft / 2.4 x 1.5m
Dry weight	600Kg
Oil Holding Cap	1132L / 249gal

## Pipe Ramp

**Pump water across roads with no excavation**

- Durable steel construction
- Linkable to cover larger areas
- 6' inlet/outlet with bauer style coupling

Our road flow pipe ramps are essential if you need to pump water across the surface of a site without excavating the ground or disrupting the flow of traffic.

Manufactured in the UK, our ramps are extremely durable and can withstand the heaviest of usage from all manner of site vehicles.

They can be as adaptable as you need them to be and are available as standard single 8' or 10' units with a 6' inlet/outlet and bauer style coupling or in larger quantities enabling you to link them together to provide longer sections.

Product name	<b>Piperamp 8</b>	<b>Piperamp 10</b>
Product code	340801	341001
Dimensions LxW	8ft / 2.4m	10ft / 3.0m
Dry weight	220Kg	250Kg

Talk to us about our environmental solutions and how we can support your sites.

## Settlement Tank 4500

**A robust way to separate your waste from your water**

- **Steel construction and steel weir wall**
- **Heavy duty lifting eyes and lashing points**
- **Linkable with other multi-stage settlement**

Our settlement tanks are designed to prevent silt and solid discharge being released into the water course or drainage system.

Each tank is constructed from robust steel with a series of integral weir walls which aid effective settlement and house a multiple Bauer quick release coupling to suit pipe inlet and outlet diameters of 2",3",4" or 6"

Product code	251000
Dimensions LxW	8.2 x 3.2ft / 2.5 x 1.5m
Dry weight	550Kg
Capacity	4546L / 1000gal.

## Water tanks

**Perfect for sites without mains connections**

- **Top water inlet filling point**
- **Steel skid frame with fork pockets**
- **Compatible with our accommodation units**

Our static water tanks are ideal for sites without mains facilities and offer a flexible and cost effective alternative to laying underground water pipes. They are also fully compatible with our range of accommodation units and water refills are available on demand.

We have a range of high volume water tanks for larger projects such as piling works, river diversions and over pumping including all the necessary pumps and accessories to suit every requirement.

Capacity	Dims LxW	Product code
1000L / 220gal.	4 x 3.5ft / 1.2 x 1.1m	220310
2273L / 500gal.	8 x 4.5ft / 2.4 x 1.4m	220500
10001L / 2200gal.	8 x 8ft / 2.4 x 2.4m	225200

Talk to us about our environmental solutions and how we can support your sites.  
**0330 094 8064** [Info@garic.co.uk](mailto:Info@garic.co.uk)

## Water Bowser

Tanks that are as versatile as they are mobile

- Secure storage for your water
- Top water inlet for easy filling
- Steel skid frame with fork pockets and heavy duty lifting eyes

Manufactured in the UK to exacting ISO standards and using heavy duty polyethylene, they can equip your site with a ready supply of site water.

Each is fully towable for easy manoeuvrability both on the public highway as well as on site. They're perfect for sites without mains water facilities and can complement the use of a static water tank by providing easy and close access to water when required for other products such as dust suppression equipment.

We have a wide selection of mobile water bowsters meaning we can get a water supply to you quickly and cost effectively.

Product name	Capacity	Product code
<b>Water Bowser 1300</b>	300gal.	221300
<b>Water Bowser 2250</b>	2273L / 500gal.	320500

<b>Water Bowser 9000</b>	9092L / 2000gal.	322000
<b>Water Bowser 9000</b>	9092L / 2000gal.	222000

## Site Waste Tank

A safe waste water storage solution that you can rely on

- Audible alarm feature to signal high capacity
- Securely stores all waste
- High level vent pipe to eradicate odours

If you provide toilet, shower and canteen facilities on site, you'll want a safe wastewater storage solution that you can rely on. We can supply waste tanks to contain a variety of dirty and discarded liquids and are available in three sizes – either 1,000 or 2000 gallon tanks.

Each steel tank is manufactured to the highest quality to prevent leakage and avoid environmental hazards.

If, for example, you need a tank to facilitate the waste removal from a portable toilet, our waste tank will securely store all the waste as well as provide you with a range of additional benefits. These include an audible alarm feature to signal high capacity, a high level vent pipe to eradicate odours and an innovative internal wash system to ensure safe cleaning procedures. All of these features are unique and give you further peace of mind that any hazardous substances and pollutants will be completely contained.

Product code	230501
Dimensions	3 x 2.4m / 10 x 8ft
Dry Weight	700kg

# Introducing the Garlic App: A Smarter Way to Manage Your Assets

## Designed to give you real-time access to your asset telemetry data.

It's a game-changer in performance monitoring, efficiency, and proactive maintenance.

## A New Standard in Asset Management

The Garlic app isn't just another tool – it's a smarter way to manage your assets with ease, transparency, and control. We're thrilled to bring you this innovation and can't wait for you to experience its benefits firsthand!

### Enhanced Performance Monitoring

Track a variety of performance metrics, including data on energy consumption, operational efficiency, and maintenance needs.

### Encouraging healthy competition

By comparing the performance of assets across different locations, your site managers can benchmark their efforts and strive for continuous improvement. This competitive spirit not only drives better performance but also encourages a culture of excellence and accountability.

### Fault detection and prevention

The app continuously monitors the telemetry data, alerting you to any anomalies that may indicate a malfunction or inefficiency. This proactive approach helps prevent costly downtime and repairs, ensuring your assets are always performing at their best.

### Reporting

Easily download performance reports for your app-enabled products on all your sites.

To find out more about the Garlic App, and get set up, please contact our expert team at:

**0330 094 8061** [info@garic.co.uk](mailto:info@garic.co.uk)

# Connected Solutions

Welcome to Connected Solutions, your trusted partner in simplifying asset management with a purpose.

We understand that managing diverse equipment needs can be overwhelming, which is why we've created a warm, streamlined approach to support your projects across the UK.

Our extensive network of expert suppliers ensures we can deliver the perfect solution for your needs, whether it's telehandlers, excavators, power generation, or lighting.

With Connected Solutions, you're not just getting equipment; you're gaining a dedicated team committed to your success. We take pride in offering a curated selection of approved third-party providers, all backed by Garic's renowned customer service.

Let's work together to bring your projects to life, efficiently and purposefully.

## Dust Cannon

Powerful, mobile dust cannons for controlling large-scale dust emissions on sites without a readily available power source, providing efficient dust suppression.

- Powerful mist-throwing nozzles
- Folding, rotatable, extendable mast
- Mobile, trailer-mounted design

## Dust Suppression Unit

Self-contained, mobile dust suppression units are perfect for controlling localised dust emissions on sites where power and water sources aren't nearby.

- Powerful, oscillating MistCannon
- Mobile, trailer-mounted design
- Water droplets sized

## Decon Unit

Portable shower units designed specifically for decontamination, ensuring that colleagues can wash off harmful pollutants.

- Twin Shower Decon Unit
- Welfare / Decon Unit
- Solus Decon unit with boot wash station

## Site Lighting

A range of tower lights that can be used in urban areas with strict noise restrictions.

- VB9 Lighting Tower
- Ritelite k45 4.5m mobile lighting tower
- Milwaukee mx fuel 3.1m led lighting tower 72v 48kg

## Road Sweepers

Road sweeper hire available throughout the UK to pick up heavy debris.

- Single and dual sweep operations
- High pressure jetting lances
- Gully emptiers

## Industrial Air Conditioning Units

A range of Industrial air conditioning systems.

- Compact air conditioning units, ideal for offices and other domestic and commercial spaces.
- Semi-industrial portable air conditioning units ideal for factories, workshops, and server room cooling applications.

Talk to us about our other environmental solutions below and how we can support your sites. **0330 094 8066** [connect@garic.co.uk](mailto:connect@garic.co.uk)

### WiFi

Fast internet access to your site.

### Containers

Containers of all sizes with refrigerated and temperature controlled options.

### Track Matting

Durable trackway and roadway mats create a protective surface for heavy machinery on delicate or unstable terrain, keeping operations smooth while safeguarding the environment.

### Fencing / Barriers

Quick and easy temporary fencing ideal for many applications in construction.

### Starlink

The world's most advanced high-speed internet system. Streaming, video calls, remote working and more are now possible in even the most remote locations.

### CCTV Towers

Flexible, wireless, video verified CCTV security towers. Robust, highly-visible deterrent offering a comprehensive surveillance, recording and remote monitoring solution.

### Bastion Tower

This advanced 360° PTZ tower detection system offers full site coverage with rapid deployment, ensuring your project stays secure from day one.

### Solar Trailer

The 360° tower has four 5MP static cameras or a PTZ with 50m IR capability, providing continuous 360-degree footage for full site surveillance.

### Wireless Alarm Site Protection

Featuring tag readers, external sounders, and seismic detectors, it detects intruders fast.

## Making your life easier

By focusing on understanding and solving your problems, we're letting you focus on what's really important to you and your customers - successfully delivering your projects.

We're helping you operate sites that comply with all relevant legislation and HSE guidelines.

We're removing risk from your day-to-day on-site operations.

We're providing real-time performance data enabling you to make more efficient decisions.

We're saving you money and helping you to have a more positive environmental impact.

## Outcome-driven solutions

Because we're trying to see things from your perspective our approach starts and ends with you. We want to understand how you feel and what causes anxiety among your on-site teams. We'll use this understanding to make your life easier so that you can focus on delivering your project outcomes.

## Planning & logistics

Our site design and installation team can help you plan your site layout prior to installation. This ensures that you maximise the available space while minimising your operating cost, as well as environmental and carbon emissions. With our in-house transport fleet and appointed persons, we really can offer an end-to-end service.

Garic has helped thousands of customers like you deliver their projects successfully for more than three decades. We'll share our experience with you so that you can share in that success.

## Why partner with us?

Technology and digitalisation are rapidly defining what our collective future will look like. Data from connected assets is already helping us to improve product performance and influence on-site behaviour. We can provide you with real-time access to this data so that you can proactively manage your sites and make more informed, more timely decisions.

The world is changing so fast that it's created a challenge none of us could have imagined even five years ago. We don't know all the answers but we do know that our ability to respond depends on harnessing our collective strength. We believe that this lies in true supply chain collaboration, creating value-add solutions that are greater than the sum of their individual parts.

We're on an exciting journey and we'd like you to be part of it. Through your feedback and collaboration we'll shape our future together so that you can help us to help you become even more successful.

## Are you ready to think beyond the box?

Partner with Garic today to deliver more successful, sustainable projects for your clients across the infrastructure, public sector, utilities and construction sectors.
