Supporting Your Infrastructure Projects.

Garic has the flexibility, knowledge and sector-specific expertise to help you deliver on your next big infrastructure project. From site planning to welfare unit provision, we're here to help.

Sustainable site solutions

Our sustainable solutions are designed to provide the most environmentally friendly and cost-effective combination of expertise, products, services and technology through the life of your project. As your requirements change, our sustainable site solutions flex so that our solution always provides what you need, when you need it. We can apply our sustainable site solutions anywhere within your site based on the products and services we offer within welfare, energy and environmental solutions – or any combination of these.

Site Setup Option B

 Capacity up to **24 people**

Combi Cabin 24 Eco 3XL

A 44' two-part unit

The first section has a Combi Cabin 24 Eco which is a refurbished, recycled unit. Created to show how we can push the boundaries and re-think industry standards on static, self-contained welfare with the aim of reducing your emissions and fuel costs on-site.

The unit, our first circular economy product, saves older units and materials from heading to landfill, whilst extending the unit's life from 20 to 60 years.

It's truly a welfare cabin that looks after the environment as well as your people.

The second section is a 24 x 9 ft unit.

This open plan cabin can be an office for 4, meeting room for 10, canteen for 22 or drying room dependant on site needs. Combi cabin canteen can accommodate an additional 10 people.

Environmentally Friendly Benefits

-  Solar charging & battery power technology/ hybrid generator on board
-  Refurbished, recycled unit reducing carbon footprint
-  Up to **90%** reduction in **CO₂**
-  Up to **90%** reduction in fuel saving
-  Up to **90%** reduction in noise

- **Circular economy refurbished unit.**
- **Fully CDM compliant with separate male and female toilets.**
- **Canteen and drying area with benches.**
- **Roof mounted solar panels power the unit with backup hybrid generator.**
- **Blown air heating system.**
- **Occupancy lights outside the toilet doors.**
- **Built in microgrid system.**
- **Different configurations available.**
- **Anti-vandal steel constructed unit.**

Site Servicing

One Less Thing to Worry About

We support our welfare solutions with a full in-house servicing team dedicated to removing waste, and replenishing water, fuel, and consumables.

With one vehicle and one visit, our servicing team solves all your waste, water, and fuel requirements. With a bespoke weekly, fortnightly or monthly

visit from our servicing vehicle, we'll remove your site waste, refill water tanks and replace any welfare consumables.

We'll even provide our renowned 5-star service to sites where you use welfare units and cabins supplied by other providers, or provide a single replenishment or removal visit at a time that suits you. Tailored support, when you need it most.

That's one less thing to worry about.

That's thinking beyond the box.

Waste removed

Waste tank and septic tank empties can be done through our servicing fleet.

Water replenished

Clean water for toilets and water tanks can be filled periodically.

Fuel refilled

We'll fill any fuel tank for self-contained cabins or bunded fuel tanks.

Consumables restocked

Our 5-star welfare servicing includes replenishment of toilet roll and hand sanitiser on every waste empty and clean water fill.

National Sanitation Qualification

Our team is qualified in the PSE NSQ certification, demonstrating excellence and environmental responsibility in sanitation.

We are committed to continuing to operate at the highest levels of the transport industry

FORS Gold for the seventh year running!

Our transport and servicing team are dedicated to driving in a safe and economical way, which is why they've been awarded FORS gold 6 years in a row

As a business, we have provided sustainable products for over 30 years and FORS is aligned with our ethos and assists us with our journey of improving our sustainability with our customers, suppliers, and the environment, whilst delivering the highest safety standards.

In 2013 we gained FORS bronze accreditation and decided to progress to Silver. Progressing from Silver to Gold not only demonstrated our commitment to road safety and the environment but also demonstrates to our customers and the public that we are committed to continuing to operate at the highest levels of the transport industry.

Transport

Our regional distribution centres lower transport costs for our customers and to hold more stock meaning we can service all four corners of the country quickly, effectively and efficiently.

We have a vehicle to suit your every need - available nationwide, 7 days a week. We are able to support your projects by delivering straight to your site, administering site moves and ad hoc consignments. All of this we do with sustainability in mind - all the while delivering outstanding service and value, the perfect transportation solution.

Our fleet of HIAB vehicles all adhere to all the latest safety standards including cyclists windows and we can provide any kind of lifting you may require, from tanks and welfare to heavy duty plant and machinery. Our highly trained and professional HIAB drivers are skilled at positioning almost anything, even those very tight situations!

Field Maintenance Support

Garic can provide a full out of hours service system that will ensure any issues are resolved 365 days a year, 24hrs a day.

Our internal Help Desk is open between the hours of 8:00am – 17:00pm.

Working in partnership with our out of hours breakdown service provider, Fleet Support Operations we offer a comprehensive breakdown service throughout the UK.

The costs for these services are charged at £52.50 per hour with a 4 hour minimum call out charge. Any parts / services required will be charged in addition.

The process diagram highlights our OOH breakdown procedure.

Out of hours service process

- 1 Breakdown notification
- 2 Repair & Resolution
- 3 Diagnosis & mobilisation

Technical Site Services

Site Planning & 3D Site Design

Our professional site planning and 3D site design service sets us apart from the competition by having your own Appointed Person to plan your site and ensure you have market-leading products that work for your project.

Through the wealth of knowledge and experience we bring via our Technical Site Services department you can benefit from a 'cradle to grave' service in which our CPCS A61 Appointed Persons (Lifting Operations) will fully engage with your project managers/site managers to not only fulfil but exceed your expectations regarding site layout and compliance.

The process:

Site analysis / evaluation

A full site survey highlights any potential cost-saving products/solutions as well as helping to reduce the carbon footprint of your project.

Risk assessment & method statement

We will compose all the legal site-specific lifting operations paperwork for our products. This ensures fully compliant lifting operations.

Site planning & 3D site design drawings

Providing you with comprehensive layouts and detailed footprints to ensure your site is maximized to its full potential.

From order to installation

If requested, we will engage with your team throughout the process from point of order through to installation, which may include the management of the lifting operations (3D lift plan drawings are also provided).

Certifications

Garic is fully certified with all the industry's leading bodies, proving that our operations are always undertaken with health, safety and environmental responsibility in mind.

Making your life easier

By focusing on understanding and solving your problems, we're letting you focus on what's really important to you and your customers – successfully delivering your projects.

We're helping you operate sites that comply with all relevant legislation and HSE guidelines.

We're removing risk from your day-to-day on-site operations.

We're providing real-time performance data enabling you to make more efficient decisions.

We're saving you money and helping you to have a more positive environmental impact.

Outcome-driven solutions

Because we're trying to see things from your perspective our approach starts and ends with you. We want to understand how you feel and what causes anxiety among your on-site teams. We'll use this understanding to make your life easier so that you can focus on delivering your project outcomes.

Planning & logistics

Our site design and installation team can help you plan your site layout prior to installation. This ensures that you maximise the available space while minimising your operating cost, as well as environmental and carbon emissions. With our in-house transport fleet and appointed persons, we really can offer an end-to-end service.

Garic has helped thousands of customers like you deliver their projects successfully for more than three decades. We'll share our experience with you so that you can share in that success.

Why partner with us?

Technology and digitalisation are rapidly defining what our collective future will look like. Data from connected assets is already helping us to improve product performance and influence on-site behaviour. We can provide you with real-time access to this data so that you can proactively manage your sites and make more informed, more timely decisions.

The world is changing so fast that it's created a challenge none of us could have imagined even five years ago. We don't know all the answers but we do know that our ability to respond depends on harnessing our collective strength. We believe that this lies in true supply chain collaboration, creating value-add solutions that are greater than the sum of their individual parts.

We're on an exciting journey and we'd like you to be part of it. Through your feedback and collaboration we'll shape our future together so that you can help us to help you become even more successful.

Are you ready to think beyond the box?

Partner with Garic today to deliver more successful, sustainable projects for your clients across the infrastructure, public sector, utilities and construction sectors.
